SELECTED PROJECT/RESEARCH EXPERIENCE

Gait Recognition

Mar. 2022 – Present

Advisor: Dr. Rama Chellappa, Dept. of Electrical and Computer Engineering

- As a part of Biometric Recognition and Identification at Altitude and Range (BRIAR), built gait recognition pipeline to identify human from long range, i.e., 500m and aerial sensor platforms, i.e., 50°. Proposed [DME](#) is integrated as a part of [BRIAR](#) project.

Sparse view 3D Reconstruction

Sep. 2024 – Present

Advisor: Dr. Cheng Peng, Dept. of Electrical and Computer Engineering

- Developed a robust 3D scene reconstruction algorithm leveraging accurate camera pose information from SfM and dense point clouds from 3D geometry reconstruction methods, achieving high fidelity under challenging sparse view conditions.

Affective Computing with Reasoning

Feb. 2024 – May. 2024

Mentor: Dr. Shao-Yuan Lo, Honda Research Institute

- Utilized the prior knowledge of Large Language Model to integrate the language and visual clues and predict viewers' emotion when they watch a video; introduced spatiotemporal emotion stimuli and detailed explanations enhancing the interpretability and efficiency of the model.
